## Mhat is TXT?

In blockchain we trust

TXT is short for TRUST, which is the token issued by Team TRUST on EOS.

TXT uses an innovative token economic design to reward contributors of the TRUST gaming platform.

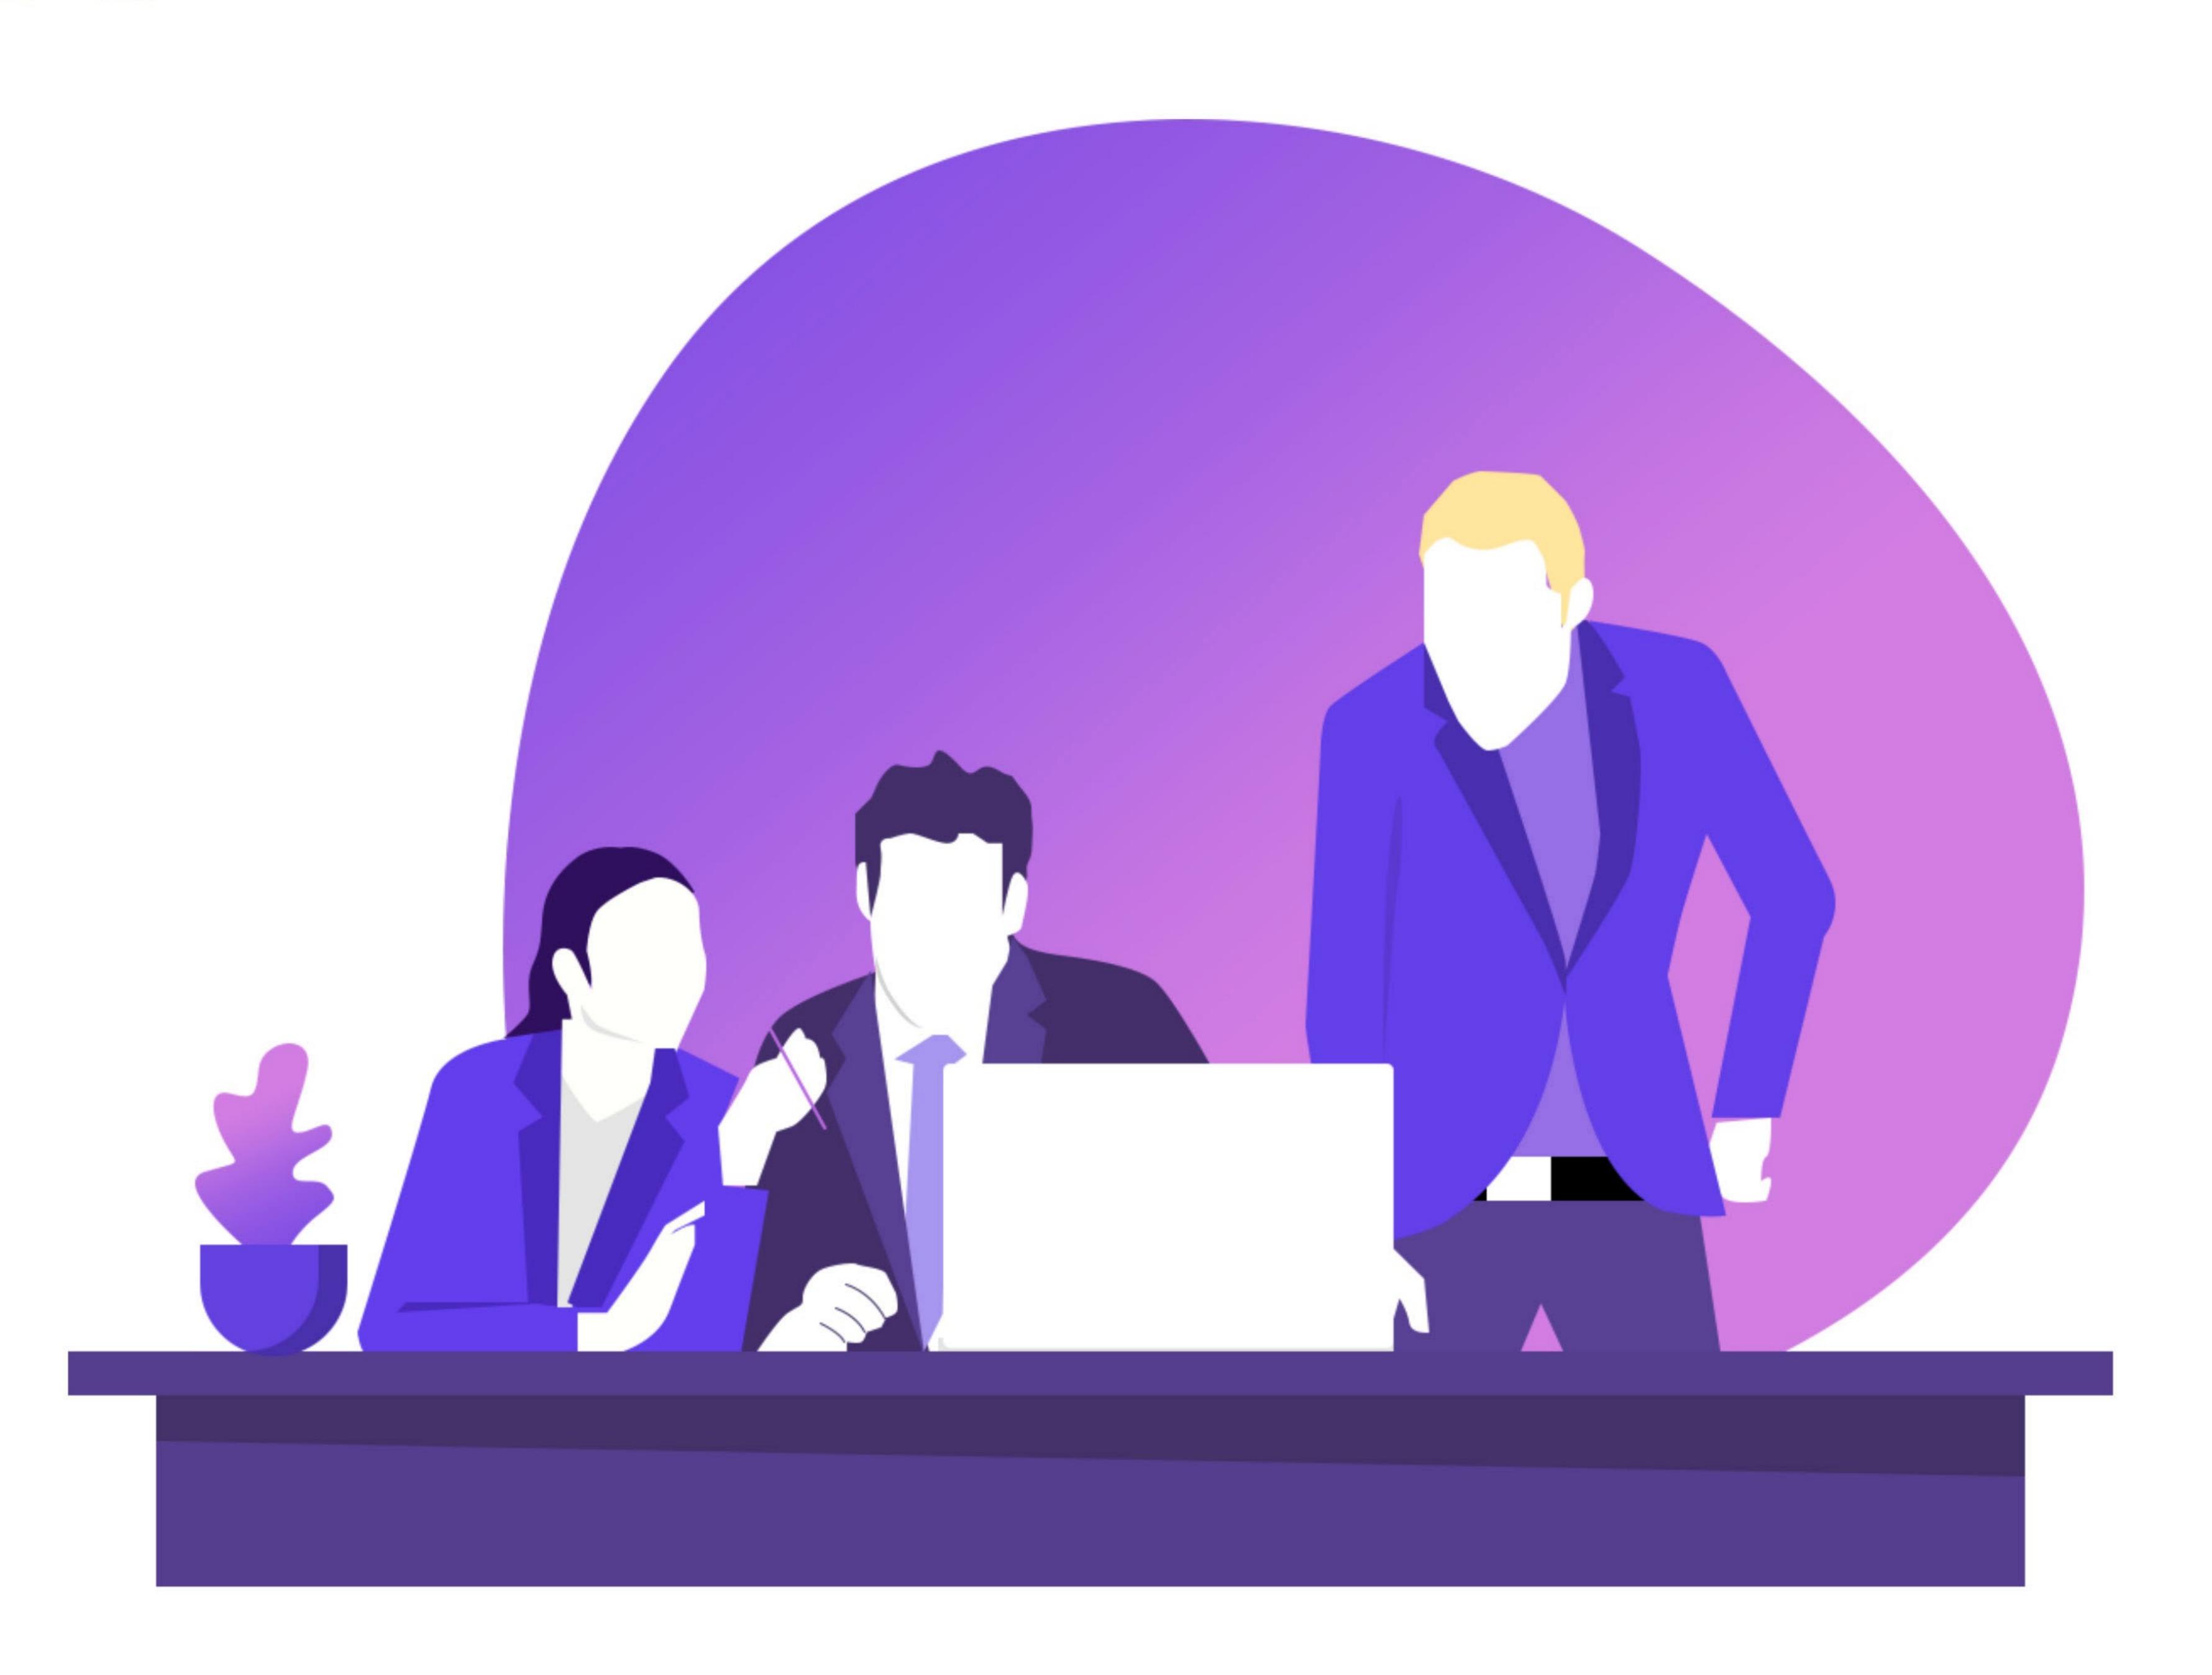

## Who is behind TXT?

In blockchain we trust

## TEAMTRUST DEVELOPS TRUSTDICE AND ISSUES TXT.

The team is composed of game veterans and blockchain geeks (10+ games shipped in total, including 2 blockchain games).

They come from many places around the world (Singapore, Spain, Turkey, Russia, etc) and forms a distributed team. Yet, they share the same vision: to build a better crypto ecosystem with games, and continuously pushing the boundaries of dApp development.

## TXT Mining

#### In blockchain we trust

TXT TO BE MINED: 2.5B

MINING MECHANISM: Similar to Bitcoin, there will be different mining cycles, every mining cycle lasts 250 days. Mining rewards will halve when next mining cycle starts, and they're distributed each day based on mining power.

MINING POWER: Measured by several factors, including betting amount and other contributions.

| CYCLE | AMOUNT<br>OF TXT | AS % OF TOTAL SUPPLY |
|-------|------------------|----------------------|
|       | 1.25B            | 25%                  |
| 2     | 0.625B           | 12.5%                |
| 3     | 0.3125B          | 6.25%                |
|       |                  |                      |
| total | 2.5B             | 50%                  |
